MEMORANDUM FOR: Chief, Development & Engineering Division, TSSG
THROUGH: Chief, Technical Services and Support Group
SUBJECT: PSG Representation
REFERENCE: NPIC/TSSG/DED-1635-69

Per your request in paragraph 3 of reference memorandum,

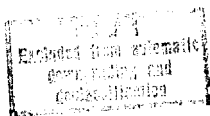

25X1 PSG/AID is designated as the responsible contact and representative for the Production Services Group in support of this program.

3 June 1969

MEMORANDUM FOR: Chief, Production Services Group, NPIC

SUBJECT: Programming the DDP-516 for the HPSC

25X1
25X1
1. The draft statement re the Computer Programming for the HPSC prepared by [] correctly reports the status of the situation. However, I would not want [] and others to interpret my concurrence in the accuracy of the statement to mean that I felt the way this matter was being handled was proper.

2. The documentation and programming efforts on the DDP-516 programming effort for the High Precision Stereo Comparator are not now being reviewed by experienced ADP personnel. Those monitoring the contract do not have sufficient ADP backgrounds to insure a high quality product. RMD/IEG has indicated that they will take over the responsibility for programming the DDP-516 for future camera systems. They have undertaken this responsibility because they apparently believe that AID would not accept tasking for this particular device. The programming for the DDP-516 is extensive and I do not believe that RMD has sufficient expertise in the programming field to do a good job. If the present situation and tasking continues, I foresee the elimination of the automatic stereo correlation capability from this system. This will occur because of the inadequacy of the DDP-516 programs to insure auto-correlation.
